

CCR/FedReg Release Notes

This format is intended to help users understand the impact that various changes will have on the different areas of CCR. The following table shows the current or upcoming release information for CCR and FedReg as well as prior releases.

Please note that the Excluded Parties List System (EPLS) interface ([Release 4.09.2 notes](#)) has been turned on and will begin filling data into CCR External Certifications as of **09/25/2009**.

CCR v4.09.3.1 – September 1, 2009				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
IAE CR-370 – Allow editing of ZIP+4 – If the D&B TAS software can't assign a DUNS+4 value on the Physical Address for a registration in CCR, the system will now allow the registrant to enter the ZIP+4 value. Before this minor release, the field was filled with zeros and locked so the registrant could not make a change.	As noted, on a failure to assign a ZIP+4 value to an address on a CCR registration or renewal, the ZIP+4 field will be open for the registrant to fill in manually. An entry of all zeros (0000) or all nines (9999) is invalid.	No changes for CCRXML or any of the other XML interfaces with CCR.	No changes for CCR Tools displays.	This does not affect the BPN/CCR Extracts.

CCR v4.09.3 – August 9, 2009				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
IAE Requested Usability Changes to CCR – A CCR usability study identified a number of log-in, update, and other web site items for change. This release implements those changes. Please refer to the updated CCR v4.09.3 documentation.	Changes have been made in the log in and invitation process and other User Management areas of CCR. Also some of the web navigation has changed. Please refer to the new CCR documentation.	No changes for CCRXML or any of the other XML interfaces with CCR.	Interface changes matching site wide layout changes for CCR Search, etc. have been made, but no functionality changes.	This does not affect the BPN/CCR Extracts.

CCR v4.09.2.1 –June 24, 2009				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
IAE CR-214-CCR Distribute and Display Additional NAICS Data – Certain NAICS codes require additional data, such as Megawatt Hours, or Total Assets for SBA determinations to be made. Those elements have been collected for some time in CCR. With this release they are now available via CCRXML and will display on CCR Search detail pages.	This additional data on certain NAICS codes will now display on detail screens.	The additional elements for these NAICS codes can now be requested. This does not affect the CCRXML version. For further information, please refer to the CCRXML documentation on the ccr.gov web site.	This additional data on certain NAICS codes will now display on detail screens.	This does not affect the BPN/CCR Extracts as the additional data is already in Extracts from an earlier release.
IAE CR-314-CCR FOIA Extract – CCR will now create a standard FOIA Extract output file once monthly on the 15 th of the month. CCR.GOV will link to the GSA FOIA request form.	Only the change in the link for the FOIA request from a DLA form to a GSA form.	This does not affect the CCRXML version nor output format.	No change for CCR Tools users.	No change for current CCR Extract Users. The FOIA Extract will be picked up by GSA for distribution to those who request it via the form.

CCR v4.09.2 – May 6, 2009				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
CR 299 – EPLS Interface with CCR- An element is defined to carry Excludes Party List System (EPLS) status in CCR. A process for updating this field from EPLS data has also been set up and tested and released to production but is not yet turned on pending a clean up of the EPLS data. Turned on for data filling as of 09/25/2009.	The results will be stored in CCR and will display on the CCR Public Search on the Detail page.	CCR XML will include this in the list of External Certifications.	The results will be stored in CCR and will display on the CCR Tools interface on the Detail page.	Available in CCR Extracts (FOUO, Proprietary, Sensitive, and Complete) as one of the External Certifications.

CCR v4.09.1 – February 25, 2009				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
IAE CR-220-FedReg – Make some currently required FedReg data optional –After survey of FedReg users, the following data elements were determined to be optional. <i>Optional Data Elements:</i> Tradestyle Name Postal Code - if USA, then zip code is required; if other than USA, postal code is required. Disbursing Office Eliminations POC (and all associated data, such as, phone and address) Sales POC (and all associated data) Accounts Payable POC (and all associated data) Annual Revenue Merchant ID 1 and 2 Credit Card FSC PSC	All the newly optional fields will continue to display on the FedReg web screens. The change is that those fields now considered optional will not be software verified for an entry.	This does not affect the CCRXML version nor output format.	This does not affect CCR Tools users.	This does not affect the BPN/CCR Extracts. FedReg Extract may have more fields with spaces than in the past, but there are no format changes.
CCR-IMR-046 – New Help Page and Documents – CCR is updating the help screens and changing the reference names on a few documents to be more descriptive. For example, the " <i>CCR Handbook</i> " will now be called the " <i>CCR Users Guide</i> ".	Help screens will have a new look, and references for a few documents will change on the web site.	This does not affect the CCRXML version nor output format.	No change for CCR Tools users.	No change for CCR Extract Users.
Allow Extract Users to Request Access via BRS – Currently CCR Extract users request access and send forms outside the BPNSE Registration System. This does not give proper visibility of users and makes it difficult to maintain a solid notification list. This change will direct Extract users to BRS for access requests allowing improved tracking of CCR Extract users.	No change.	This does not affect the CCRXML version nor output format.	No change.	Existing Extract users will not be affected at this time. But new access requests will be required to complete the BRS forms beginning with this release. At some point in the future, current extract users will be requested to do so too.

CCR v4.08.2.3 – December 21, 2008				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
<p>IAE CR-271-CCR – Replace TPIN Log-in with Strong Passwords in CCR – CCR will change to individual accounts (User ID and Password) for log-in to maintain a registrant's data. This will replace the current Trading Partner Identification Number (TPIN) or confirmation number log-in.</p> <p>With this implementation passwords are individually controlled, updated, and recovered replacing the system assigned TPIN. In addition, a CCR maintainer may be allowed to update multiple DUNS numbers from one sign on.</p> <p>The accounts created are for the Primary CCR Point of Contact (POC) and the Alternate CCR POC from the registration. Also implemented in this release will be authority to create additional CCR Maintainers that are not one of the registration's official POCs.</p> <p>Upon first TPIN access of a registration, after this release is implemented, the user signing in will be asked to set up their account in CCR.</p> <p>All CCR registrations will need to have valid e-mail addresses for the CCR Primary and CCR Alternate POCs in order for this to occur smoothly.</p> <p>The change over will be a phased approach as people connect to their CCR Registration. It is expected that all users will be set up with new Profiles by December 21, 2009.</p>	<p>Registrants will now have to create a User Account (User ID and Password) within CCR upon first access via TPIN after this Release is implemented.</p>	<p>This release does not affect the CCRXML version nor output format.</p>	<p>This release does not affect CCR Tools users.</p>	<p>This release does not affect the BPN/CCR Extracts.</p>

CCR v4.08.2.2 – September 24, 2008				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
<p>IAE CR-115-CCR – Disaster Relief Registry in CCR – CCR will now give registrants the option of filling in Disaster Relief Registry entries in CCR. These entries will help the Department of Homeland Security find vendors that service a certain area when disasters occur.</p> <p>At this point the data collection is being implemented with further search capabilities on these fields to come at a later date.</p> <p>Information collected as part of this registry is a set of Bonding Levels and Locations Served.</p> <p>The entire page in CCR Update is optional. If a vendor does not want to be included in the Disaster Relief Registry, the page can be ignored.</p>	<p>The registrant will have the option to access a new CCR Update page that allows for data collection for a new Disaster Relief Registry that will be part of CCR.</p> <p>CCR Search and CCR Tools will now display the Registry entries, if entered.</p>	<p>The newest version of CCRXML will now include the Disaster Relief Registry fields. As these fields are optional, users that do not need them can continue to use their current XML queries. You should update the version number in the CCRXML request to stay current with the newest version. As CCRXML is backward compatible up to three versions, even this is not a requirement at this time for FY end.</p> <p>Please see the latest CCRXML documentation for the details.</p>	<p>The new Disaster Relief Registry fields will display now on the CCR Tools pages.</p>	<p>The newest version of BPN (CCR) Extracts will now include Disaster Relief Registry fields. Please see the latest BPN Extract documentation when it is posted on our web site for the details.</p> <p>Prior versions of BPN Extract are still supported, so users have time to work in a conversion as resources permit.</p>

CCR v4.08.2 –July 30, 2008				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
<p>IAE CR-054-CCR – CCR “No Public Display” Option – CCR will now give registrants the option of having their CCR Public Data displayed in the CCR Public Search or having it suppressed from CCR Public Search results.</p> <p>The current system always includes all registrations in CCR Public Search results, and this will be the default unless the registrant chooses to opt out of CCR Public Display.</p> <p>As this is phased in over the next five months, systems that pick up CCR data via CCR Extracts or CCRXML will be asked to also suppress pre-award Public displays of CCR data where this flag is set by the registrant.</p> <p>The option does not affect CCR Public Search results for users coming from government domain systems.</p>	<p>The registrant will have the option NOT to be included in CCR Public Search results. This option will now be given in the CCR Update registration process.</p>	<p>The newest version of CCRXML will now include the CCR NoPublicDisplay flag. Please see the latest CCRXML documentation for the details.</p> <p>Prior versions of CCRXML are still supported, so users have time to work in a conversion as resources permit.</p> <p>Once this version or later is used, it is expected that any pre-award Public display of CCR data will be suppressed if the registrant has chosen to opt out.</p>	<p>The new field will display now on the CCR Tools pages although there will be no suppression for CCR Tools users as this is a granted access, log-in situation and not considered “Public” in nature.</p>	<p>The newest version of BPN (CCR) Extracts will now include the CCR “No Public Display” flag. Please see the latest BPN Extract documentation when it is posted on our web site for the details.</p> <p>Prior versions of BPN Extract are still supported, so users have time to work in a conversion as resources permit.</p> <p>As noted under XML, please abide by the flag in pre-award Public display situations once you are picking up the latest version of the Extract.</p>
<p>IAE CR-242-CCR – Add Two New Business Types – The following Business Types have been added to CCR:</p> <p>G3 – Alaskan Native Servicing Institution (ANSI) G5 – Native Hawaiian Servicing Institution (NHSI)</p>	<p>These will be listed on the Corporate Information page along with the rest of the Business Types and can be optionally chosen by the registrant.</p>	<p>These new values will be included in the CCRXML output, if chosen by the registrant.</p>	<p>These new values will display on the CCR Tools results page, if chosen by the registrant.</p>	<p>These new values will be included in the CCR Extract output, if chosen by the registrant.</p>
<p>IAE CR-236-CCR – Make Location Size data optional – The Location size data (Receipts and Employees) in CCR will no longer be mandatory. The worldwide size data will continue to be mandatory.</p>	<p>The CCR Update module will no longer treat these as mandatory.</p>	<p>Location size tags will still be present on all registrations but may be empty if the registrant has not chosen to fill this portion in.</p>	<p>No change, although some registrations will not have these elements filled in on the detail display.</p>	<p>Location Size elements will only be in the record if the registrant entered that data.</p>
<p>IAE CR-244-CCR – Move “S-Corp” and “LLC” from “Corporation” to “Other” for Organization Type – This change shows the actual corporate make-up of an S-Corp or an LLC. They are not a corporation in many respects.</p>	<p>The place to select S-Corp or LLC has moved in the CCR Update Module to the Organization Type of “Other” on the CCR input screens.</p>	<p>Users of CCRXML will need to be aware that some registrations formerly with Organization Type of “Corporation” will now have the Organization Type of “Other”.</p>	<p>The S-Corp and LLC will now show in CCR Tools along with an Organization Type of “Other”.</p>	<p>Users of the BPN Extracts will need to be aware that some registrations formerly with Organization Type of “Corporation” will now have the Organization Type of “Other”.</p>

CCR v4.08.1.2 – May 07, 2008				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
IAE CR-110-CCR – Include Foreign Province Name in CCR – CCR will now carry a Foreign Province name for the Physical Address as well as for Points of Contact. The Physical Address Province Name will come from D&B as does the rest of the Physical Address. This new field can be any subdivision of a country whether Province, County, State, Department, Parish, or other designation. The USA and Canada will continue to use the two-character "state/province" code already in CCR.	This will now be displayed in CCR Update in the D&B data, if present. It will be optional on Points of Contact in CCR.	The newest version of CCRXML will now include the Foreign Province. Please see the latest CCRXML documentation for the details. Prior versions of CCRXML are still supported, so users have time to work in a conversion as resources permit.	The new field will display now on the CCR Tools pages.	The newest version of BPN (CCR) Extracts will now include the Foreign Province. Please see the latest BPN Extract documentation when it is posted on our web site for the details. Prior versions of BPN Extract are still supported, so users have time to work in a conversion as resources permit.
IAE CR-116-CCR – ORCA Register/Update Flag – When a registration is completed in CCR, a notice and a link to ORCA are provided for registrants.	CCR registrants will be notified that they may need to register in ORCA or update their ORCA certifications.	No impact.	No impact.	No impact.
IAE CR-153-CCR – Annual Validation of CCR Data – Once within every twelve-month period, a registrant will be asked to revalidate each page, except the IRS Consent page, within CCR to insure a review of all CCR data for possible updates. In addition at this time, the Size information (Employees, Receipts, and some NAICS related size data) will be blanked out for new entry.	Revalidation and some reentry will be required once every twelve months. The timing will depend on initial registration date in CCR and current renewal date.	No impact.	No impact.	No impact.
IMR-16 and IMR-24 – Stop CCR Letters (hard copy) and Send Requests via email – To improve the timing of communications between CCR and registrants and to save money spent on mail production and handling, hard copy letters will be discontinued. Both Primary and Alternate CCR POCs will get email notices.	No direct impact within CCR Update; although notices will now only be emailed to registrants.	No impact.	No impact.	No impact.

CCR v4.08.1 – March 30, 2008				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
IAE CR-106-CCR – D&B Out-of-Business Flag Recognized in CCR – The Out-of-Business flag that is available on the D&B interface with CCR will now be checked when a registrant comes into CCR to Register for the first time, Update any field, or renew his/her registration. If the company is shown as "out of business" per D&B, the registrant will be directed to contact D&B.	CCR Update will not allow continuation of the registration until CCR is notified via D&B Monitoring that the company is again flagged as "in business".	No impact. Flag does not go out on XML output.	No Impact.	No Impact. Flag does not go out on CCR/BPN Extract.
IMR-27 – TPIN and Confirmation Number access locked after excessive tries – In order to better secure the updating of a registrant's CCR information, a new timeout will be implemented. If a registrant tries to log into their CCR registration, either with a TPIN or the Confirmation Number, but fails the validation multiple times, the registration will be locked from updating for 30 minutes.	Log in attempts will be logged and multiple failures will cause a lock out for 30 minutes before the log in for that DUNS number can be attempted again.	No impact.	No impact.	No impact.
IAE CR-232-CCR – CCR/FedReg Cross Reference – When a new registration is completed in CCR, the DUNS number will be checked against FedReg. If the DUNS is registered in FedReg, an e-mail will be sent to the primary FedReg Point of Contact (POC).	CCR registrant will be notified that the FedReg POC will be notified of the registration in CCR.	No impact.	No impact.	No impact.
IAE CR-232-FedReg – CCR/FedReg Cross Reference – When a new registration is completed in FedReg, the DUNS number will be checked against CCR. If the DUNS is registered in CCR, an e-mail will be sent to the primary and secondary CCR POCs.	FedReg registrant will be notified that the CCR POCs will be notified of the new registration in FedReg.	No impact.	No impact.	No impact.

CCR v4.07.3.4 –December 3, 2007				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
IAE CR-125-CCR – Realign Corporate Information Page – In an effort to better align Business types within CCR with Organization types, the Corporate Information Page has been changed. Business types available for choice will depend on the Organization type chosen. In addition, all registrants will be required to re-enter all of their Organization/Business types on their first update or renewal after this implementation.	CCR Update will present various Business types to a registrant based on the Organization type chosen. On the first update or renewal after implementation, registrants will be required to re-enter their Corporate information.	No impact.	No Impact.	No Impact.
IAE CR-154-CCR – Allow unlimited number of NAICS codes – Previously CCR was limited to 20 NAICS codes per registrant. With this release this limit has been removed.	Registrants will now be able to enter more than 20 NAICS codes.	No impact. Current CCRXML, SBAXML, and EDIXML all have the capability to go beyond the old 20 NAICS limit.	No Impact.	No Impact. Current version CCR Extract already allows for more than 20 NAICS codes to be extracted. Older versions will still remain at the 20 NAICS limit as the older versions are no longer updated with CCR changes.
CCR IMR-008 – Various Wording Changes – Aggregate average annual revenue and Location average annual revenue have both been changed to use the word “receipts” in place of “revenue”.	CCR Update and CCR Search will now reflect Receipt in place of Revenue for these fields.	No impact.	Fields will have new labels using the word receipts rather than revenue.	No impact.

CCR v4.07.3.3 – November 5, 2007				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
IAE CR-124-CCR – Size Standard for Banking, Utilities and Petroleum – CCR will collect additional size information for specified NAICS codes in the above industries to assist the Small Business Administration in making its determinations. This information will be forwarded to the SBA when the registration is complete. In addition, all vendors will be required to re-enter all of their NAICS codes on the first renewal after this implementation.	CCR Update will request additional size information for registrations containing specified NAICS codes. On the first renewal after implementation, vendors will be required to re-enter all of their NAICS codes.	No impact.	No Impact.	No Impact.

CCR v4.07.3.2 – Estimated October 8, 2007				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
<p>IAE CR-065-CCR – Conversion of CCR Update to dot net – This release is primarily to update technologies to remain current with DoD requirements. We have also included the updated CCR look and feel to the Update module.</p> <p>CCR handbook and other documentation will be updated for the new web site look as well.</p>	<p>The new CCR Update will have the look and feel of the rest of CCR now. Functionality should be the same as in release 4.07.3. This update sets the stage for future enhancements.</p>	<p>No impact.</p>	<p>No Impact.</p>	<p>No Impact.</p>
<p>IAE CR-171-CCR – Change JWOD references to AbilityOne – All references to JWOD have been updated in the CCR system (and the CCR Handbook) to AbilityOne which is their new public name. For a time the notice (formerly JWOD) will be part of the name in CCR.</p>	<p>New name will be reflected in CCR Search web page.</p>	<p>No change in the Business Type itself so no impact except to update downstream systems translations to include the new name.</p>	<p>New name will be reflected in CCR Tools web page.</p>	<p>No change in the Business Type itself so no impact except to update downstream systems translations to include the new name.</p>

CCR v4.07.3.1 – October 1, 2007				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
<p>IAE CR-082-CCR – Switch to 2007 NAICS Codes – This dated release is required to keep CCR and SBA in synch as we move to the new NAICS 2007 Codes.</p> <p>This affects new and renewed registrations from October 1 and beyond. Registrations with old NAICS codes may still be in the CCR system through September 30, 2008. Registrations will have to be updated at next access in CCR by the vendor.</p> <p>A list of all of the 2007 NAICS Codes can be found here: http://www.census.gov/naics/2007/naics07-6.xls</p> <p>A cross reference of NAICS2002 to NAICS2007 can be found here: http://www.census.gov/naics/2007/n02-n07.xls</p> <p>The U. S. Government web page dealing with NAICS can be found here: http://www.census.gov/epcd/www/naics.html</p>	<p>Vendors with NAICS codes on their registration that are eliminated with this conversion will fail the edits against the new NAICS table and will be required to correct their NAICS before they can finish renewal in CCR. New registrants will only have 2007 NAICS from which to choose.</p> <p>Search results will not show NAICS codes that are made obsolete through this change.</p>	<p>Over the course of the next year any 2002 NAICS that were eliminated from the NAICS 2007 set will fall off registrations as vendors renew.</p> <p>All new and renewed registrations will go through an edit to insure that only 2007 version NAICS are used.</p>	<p>Search results will not show NAICS codes that are made obsolete through this change.</p>	<p>Over the course of the next year any 2002 NAICS that were eliminated from the NAICS 2007 set will fall off registrations as vendors renew.</p> <p>All new and renewed registrations will go through an edit to insure that only 2007 version NAICS are used.</p>

CCR v4.07.3 –August 26, 2007				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
General note on Extracts for Version 4.07.3	N/A	N/A	N/A	<p>The biggest change in CCR Extracts is that we will begin supporting multiple versions of the BPN/CCR Extract output. This will allow CCR to make changes to the output as needed for support of IAE initiatives without causing our BPN/CCR Extract users additional work to change their Extract use to coincide with every CCR release.</p> <p>The multiple versions will allow an Extract user to continue with an older version of the extract for up to a year after a newer release is implemented.</p>
IAE CR-101b-CCR - Business Size Validation, D&B Family Tree - This change implements the <i>dissemination</i> of Location Size data to complement the Size data already collected for all affiliates (worldwide size). This is in relation to the average number of employees and the average annual revenue. If there are no affiliates, the Location Size data will be the same as the Worldwide Size data.	No impact	<p>CCR XML (output) - Beginning with release 4.07.3 will include the size data for the specific location registering in CCR along with their worldwide operations numbers.</p> <p>SBAXML (input/output) – Beginning with release 4.07.3 will include the location size data.</p> <p>No impact on D&B XML and EDIXML.</p>	No impact	Beginning with release 4.07.3 CCR Extracts will include the size data for the specific location registering in CCR along with their worldwide operations numbers. The Location Size information will be available in Proprietary, Sensitive, and Complete extract output.
IAE CR-076-CCR – Support new SBA designation 8(a) Joint Venture – The SBA will be adding a new Certification to the list of SBA Certified Business Types. This new type will be code JT and is defined as “SBA Certified 8A Joint Venture”.	This new certification will show along with other SBA certifications in Search.	<p>SBA XML and CCRXML both support this new certificate.</p> <p>EDIXML and D&B XML are not affected.</p>	This new certification will show along with other SBA certifications in Search.	A change will be made to the extract output setting the SBA Certifications to be represented in a repeating data field set.

CCR v4.07.3 –August 26, 2007				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
IAE CR-065e-FedReg – Conversion of FedReg to dot net – The FedReg screens will be joining CCR in the new colors. We also have upgraded the underlying structure to maintain current technology and security standards. The new FedReg will interface with BRS/BASIC for access control and is a requirement for IAE CR-053-CCR FedReg Merge implementation.	New look and feel to FedReg as it will also share the colors of CCR. Also, all FedReg log in users will have new user IDs assigned in the conversion to BRS/BASIC authentication.	No XML impact.	No impact.	No impact to FedReg Extract users.
IAE CR-053-CCR – Merge FedReg data into the CCR Search – Now the CCR Search and CCR Tools will return FedReg data along with CCR data. The combined CCR/FedReg output follows the current restrictions on FedReg viewership.	CCR Search will return FedReg data along with CCR data when your incoming URL is a .mil or .gov site.	No XML impact.	CCR Tools will return FedReg data along with CCR data when your incoming URL is a .mil or .gov site.	No impact to FedReg Extract.
IAE CR-130-CCR – ccr.gov Redesign – The front page of ccr.gov is getting a new look with Release 4.07.3. It will now have a place for not only current Bulletin Board entries but you can look back to archived entries as well. In addition, we are taking your suggestions to make navigation easier.	New look as noted in the description.	No impact	No impact	No impact.
IAE CR-065a-CCR – Conversion of CCR Update to dot net – The CCR Update screens will be losing their greenness and will join the rest of CCR in the new colors. We also have upgraded the underlying structure to maintain current technology and security standards.	CCR Update now will have the new color scheme for CCR.	No impact.	No impact.	No impact.

CCR v4.07.2 – May 4, 2007				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
CR 101a- Business Size Validation, D&B Family Tree- This change implements the <i>data collection</i> of Location Size data to complement the Size data already collected for all affiliates (worldwide size)	CCR Update site will have to display the new fields and the reminder on the general information page	Not in 101a - SBA XML (input/output), D&B XML (input), EDIXML (output), and CCRXML (output) will not be affected.	Displays the Location Size information on the detail page.	No Impact until v.4.07.3 Release
CR 99 - Removal of Large Business Indicator- In April 2005, CCR implemented the logic, through the Small Business Administration (SBA), to derive Small Business Size Status by revenues, employees, NAICS codes, and other small business defining factors. CCR indicates the Small Business Size Status next to each NAICS code listed in the profile.	Large business will no longer be returned on CCR Public Search/CCR Tools Search and will no longer be a choice on Corporate info page in CCR update.	Large Business as a Business Type will no longer be available in any XML.	No Impact	Large Business will no longer be available in Extracts.
CR 105 - DBA (Foreign Parent)- This change will prevent CCR from using a DBA line from D&B if it is the comment (Foreign Parent . . .).	Background code for CCR Update to ignore a BV packet Tradestyle element when it has the key phrase in it. Screen itself does not change.	No Impact	No Impact	No Impact

CCR v4.07.1 – February 11, 2007				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
CR 56 - SBA NAICS Size Standards- It means that the CCR Business Types 21/Small Business and B2/Emerging Small Business will be retired. The current Yes/No flag showing SBA determinations (now including the exception breakdown when applicable) will be tied to each NAICS code chosen by the CCR registrant.	It is expected that CCR will still collect only the front end data that it currently collects on each registrant as the exceptions are internal to SBA.	The CCRXML schema for external interface, like used by ORCA, will have to change to incorporate the new data elements.	No Impact	It is expected that CCR will still collect only the front end data that it currently collects on each registrant as the exceptions are internal to SBA.
New CCR Web site Look - This release included a new look and feel to CCR Inquiry, CCR Tools, and the ccr.gov home page.	No Impact	No Impact	No Impact	No Impact
CR 74 - Federal Debt Flag- An element for the Delinquent Federal Debt flag is defined in this release for extracts and CCRXML but filling this data element is not yet implemented.	Available in CCR Extracts (FOUO, Proprietary, Sensitive, and Complete) and Custom CCR extracts if it is determined that extract users need this data.	CCR XML will need to have a new element defined.	The results will be stored in CCR and will display on the CCR Tools interface and in a Public search on the Detail page.	Available in CCR Extracts (FOUO, Proprietary, Sensitive, and Complete) and Custom CCR extracts if it is determined that extract users need this data.

CCR v3.06.3 – July 28, 2006				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
Canadian Province Codes- A change in accepted Canadian Province Codes has gone into effect with the 3.06.3 release of CCR. Obsolete Canadian Province Codes for Quebec and Newfoundland will no longer be allowed in CCR. Only the current codes for Quebec (QC) and Newfoundland/Labrador (NL) will be accepted in CCR.	No Impact	No Impact	No Impact	The updated registrations will be sent out in CCR extracts.
D&B Name Address Verification - This CCR revision renders most CCR registrants unable to change, directly in CCR, their Legal Business Name, DBA (Doing Business As) and Physical Address. They must correct name and address information for those fields at DUN & Bradstreet (D&B).	A new screen allows the user to use the address data presented or refuse.	Potential exists for "bad" addresses for Physical Address and missing ZIP+4 to be included in CCR XML.	No impact	Potential exists for "bad" addresses for Physical Address and missing ZIP+4 to be included in extracts.
CCR Zip +4- This change affects the way ZIP Codes are processed for a registrant's physical address. When a new registrant registers in CCR, DLIS will execute the D&B Toolkit Address Standardization Transaction to get the Zip +4 from Dun & Bradstreet on initial business verification. If there is not a Zip Code +4 from DnB, the position will be zero filled.	Users will see a "0" filled if there is not a zip +4.	No Impact	No Impact	No Impact

CCR v3.06.2 – April 30, 2006				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
CR 42b - Prior DUNS - Monthly update will be retrieved from D&B with Prior DUNS information. This will now display on the CCR Tools profile.	Impact - add new field in CCR to store registrant's prior DUNS number.	No Impact	No Impact	No Impact
DUNS Check Digit Algorithm - Dun & Bradstreet (D&B) will soon delete their requirement for a check digit in a DUNS number. CCR is ready now for new D&B DUNS numbers with the termination of check digit checking with this release.	No Impact	No Impact	No Impact	No Impact
JWOD - JWOD Business type will no longer be a self-certified value. CCR will be fed validated DUNS numbers from the Committee charged with JWOD validation. Only those Non-Profit agencies on the validated list will be marked as JWOD in CCR.	Impact - CCR to display new indicator in CCR Update, CCR Search, and CCR Tools	No Impact	No Impact	No Impact

CCR v3.06.1 – January 30, 2006				
Change Request Information	WEB/GUI	XML	CCR Tools	Extracts
CR 46 - Small Agricultural Coop - A new choice for Small Agricultural Co-operative business type went into effect on Jan 30, 2006. The definition for "small agricultural cooperative" can be found at http://www.sba.gov/size/indexglossary.html .	Impact - A new Business Type, "Small Agriculture Cooperative" will be displayed.	Impact - SBA changed the small business size standard logic used in the profile transfer program to accommodate the new business type.	Impact - A new Business Type, "Small Agriculture Cooperative" will be created.	Impact - A new Business Type, "Small Agriculture Cooperative" will be created.
CR 40 - DUNS +4 - DUNS+4 registrations being restricted to EFT data went into effect on Jan 30, 2006. This changes the way the DUNS +4 records will be processed. Only the primary DUNS CCR POC will be able to make changes to DUNS+4 records. In addition, this will only allow changes to be made to the EFT portion of the CCR record. The Duns+4 records will otherwise carry the registrant's information from the primary DUNS CCR Registration. The CAGE Codes on all DUNS+4 records will not be affected by this change, they will continue to receive a unique CAGE Code.	Impact - Fields in DUNS +4 records will be locked from certain updates.	No Impact	No Impact	No Impact
Linkage Monitoring - D&B Linkage Monitoring went into effect on Jan 30, 2006. In the past, Dun & Bradstreet (D&B) provided changes to corporate linkage (hierarchy) information to CCR on a 30-day cycle. This created the possibility of a lag in data updates hitting CCR. Linkage Monitoring will cut this lag down to 24 hours once the change hits the D&B Worldbase database.	No Impact	No Impact	No Impact	No Impact
Error Codes - D&B Error Codes Processing improvement went into effect on Jan 30, 2006. D&B will provide better descriptive information to CCR to present useful guidance to the registrant.	Impact - Error code interpretations will now defer to D&B supplied verbiage on CCR.gov.	No Impact	No Impact	No Impact
